CORE CAPABILITIES

Commercial electrical

Electrical support for commercial buildings and operational facilities.

- Power, lighting and circuits
- Switchboards and upgrades
- Fit-outs and equipment connections
- Maintenance and fault finding

Industrial electrical

Plant, machinery, and the power and control systems behind your operation.

- Motors and variable speed drives
- Motor control centres and panels
- Instrumentation and control wiring
- Testing and commissioning

OUR SPECIALISATION

Water treatment & the pump industry

Pumps & pump stations
Booster pumps, transfer systems, motors and variable speed drives.

Treatment & dosing
Electrical work for treatment plant, dosing equipment and process machinery.

Controls & instrumentation
Level, pressure and flow instruments, control panels and field wiring.

Maintenance & commissioning
Fault diagnosis, equipment upgrades, testing and commissioning support.

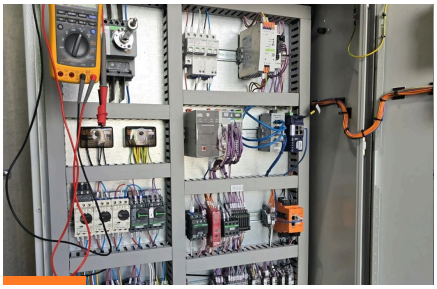
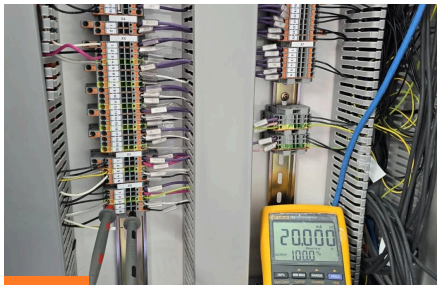
Technical expertise. Practical support.

Altor's site work covers control panels, instrumentation and pump electrical systems, supported by methodical fault finding, testing and commissioning.



Industrial control panels
PLC equipment and panel wiring



Instrumentation & testing
Control wiring and 4–20 mA signal testing

Pump electrical systems
Booster plant and local isolation

Data logging & monitoring

Record equipment and instrument signals over time to investigate intermittent faults, review operating trends and explain the findings and recommended next steps.

Intermittent faults
Trips, stoppages and recurring alarms

Electrical loads
Current, voltage and energy use

Process readings
Pressure, level and instrument signals

Technical services

Controls & instrumentation
Control wiring, field instruments, panel modifications and fault diagnosis.

Motors, drives & MCCs
Installation, testing and fault finding for motor and drive systems.

Breakdowns & fault finding
Support for electrical outages, failed equipment and difficult faults.

Subcontract & project support
Installation, commissioning and site support for contractors and project teams.
